What to see in 2023!

Welcome to our 2023 Product Brochure.

We are excited to bring you a wide range of beautifully designed and sustainably made products. We are aware that finances for many will be tight this year given the challenging economic climate. We have made a concerted effort to keep our pricing as keen as possible, continuing to offer products that are as kind to your pocket as they are to your skin.

Throughout our twenty-four-year journey we have been enthralled by the creative process and always strive to create wonderful new products. This year proves no different as we add three new product ranges to our portfolio.

H2EAU is a luxury bath & body range packed with natural, deep-sea ingredients including sea salt, sea kelp, red sea algae, sea mineral mud and sea water. Fragranced with ocean notes of crystal blue waters to lull you into an oasis of relaxation.

Sandalwood Country Club is a new unisex home and body care line. Inspired by the diverse base fragrance of sandalwood and designed to bring a sense of sophistication into any home. Sandalwood Country Club is a celebration of the great outdoors and promises to

evoke memories of a country walk in a tweed jacket or an evening camp fire on the beach. This new range comes in two uniquely divine fragrances; Driftwood & Sea Salt and Cedarwood & Moss.

We are also proud to introduce a fur-bulous new luxury pet care collection, **Doggy Styling**. Made in the UK, the mild PH balanced formulations cater to canine sensitive skin and feature deeply nourishing active ingredients to keep coats healthy and tails wagging.

In addition to crafting exciting new ranges, we spent last year listening intently to our customers desires while casting an eye over new trends in our industry. This encouraged the addition of several new products to existing lines and Christmas offerings. A Lip Care Set in our Repair range, Body Care Gift Sets in Naturally European and new pampering advent calendars are just a few examples of new products to look out for in brochure and on the trade stand.

We have made no secret of our desire to become a fully sustainable company in recent years. We continue this push into 2023, namely with the induction of PCR plastic bottle caps and tube closures to new and

existing products. Efforts have also been made to reduce packaging wherever possible and move to utilize corrugated board where packaging is necessary. Making best use of local supply continues to be a priority in a bid to reduce the carbon emissions brought on by freight transportation.

The jewel in the crown of our sustainable ambitions continues to be **The Ministry of Soap**, our sister company established in 2021. We manufacture this entire range in-house and to the very highest of environmental standards. The Ministry of Soap uses RSPO certified 'segregated' sustainable palm oil 100% traceable from locations where endangered species such as orangutans are not at threat. We have added new products to Ministry of Soap this year with several new designs.

On behalf of all the team, we thank you for taking the time to get to know our company. We would be thrilled if you devoted some of your precious shelf space to our products. To our returning customers we thank you for continuing to choose us. We wish you all the very best in 2023!

Sakina Buoy Chairman

Naturally European

Inspired by luscious European landscapes, Naturally European offers a complete range of luxurious body care and home fragrance. These beautiful gifts provide nourishment and protection to all skin types.

Oak Moss & Vetiver

5

Cedarwood & Moss

Sandalwood provides the base to this invigorating scent. Damp, moss-covered wood rests beside fresh green grass and verbena in this homage to misty morning walks through the Somerset countryside. The only thing missing is a tailored tweed jacket.

Ministry of Soap

Dedicated to manufacturing beautifully designed, sustainable soap, Ministry of Soap uses RSPO 'segregated' palm oil to ensure our soaps are ethically sourced.

The palm oil used in the Ministry of Soap is traceable from only two locations; the Solomon Islands and Papua New Guinea. Our supplier works with smallholder farmers to sustainably improve their palm oil yield whilst supporting with employment, housing, education, and medical facilities via the NBPOL foundation.

Our triple milled luxury soaps use only the finest sustainable ingredients, ensuring they are good for us and good for the planet.

We are proud to be manufacturing in the UK and feel strongly about the environment, doing what we can to protect and conserve with full transparency.
